FITI Vietnam Testing Lab "Grand Opening"

"Committed To Quality"

fiti FITI Testing &
Research Institute

About FITI

The first KOLAS accredited laboratory in Korea

FITI is the first laboratory in Korea to obtain ISO 17020 and 17025 accreditation from Korea Laboratory Accreditation Scheme (KOLAS).

Multi-field Testing & Research Institute

FITI Testing and Research Institute is an affiliate of Korean Agency for Technology and Standards. We are a multi-field testing & research institute with expertise in apparel, consumer goods, industrial materials and environmental analysis.

In industrial material fields, we test and evaluate geotextile, automotive decor, water safety equipments, artificial turf, filters, etc.

In environmental fields, we analyze water quality, air quality, soil, children's play area safety, asbestosis, etc.

Global Network

FITI's services are available worldwide in association with TÜV Rheinland and SKZ in Germany, INNtex in Mexico, BOKEN in Japan, CTTC, CTT, CIQ and QFI in China, Texanlab in India, SUCOFINDO in Indonesia, TRI in Vietnam and THTI in Thailand.

Inspection

Auditing

Total Quality Solution Provider

FITI Testing & Research Institute offers our clients a comprehensive quality solution ranging from testing and inspection to factory evaluation, social compliance audit, training and root cause analysis.

Testing

We provide all types of testing services including physical properties testing, fiber analysis, harmful substance analysis, heavy metal analysis and functional textile testing.

Inspection

We provide all types of inspection services including fabric, product and during-process inspection.

Certification

Through quality certification systems such as Cashmere Mark and Sanitary Finish Mark, we promote product safety and quality.

Factory Evaluation and Social Compliance Audit

With factory evaluation and social compliance audit, we help our clients develop and improve their production management.

Training

FITI provides education and training on all subjects requested by our clients including test methods, quality management, regulatory updates and global brand testing manual guidance.

Root Cause Analysis

We perform root cause analysis on manufacturing process and final products with our latest analysis instruments.

NO.1 Testing Service Competitiveness

WHY FITI

Faster Turnaround Time

FITI provides the fastest turnaround times in the industry with a standard of 3 working days. Our decades of quality expertise and supply chain innovations allow us to allocate our resources to provide more responsive and more accurate results for all of our valued clients.

Competitive Testing Fee

As a non-profit institution, FITI offers 5~30% lower fee compared to the industry average. Faster turnaround time further reduces cost by 8.5%.

Quality Manual & Review

Based on our extensive understanding of regulatory requirements and the accumulated experience as a quality assurance service provider, we offer our clients safety and quality manuals best suited for their needs. If there is a preexisting quality manual, we can provide updates by complimentary reviews.

Regulatory Update

Regulatory information is provided biweekly via FITI Plus newsletter. We help our clients deal with increasingly complicated regulatory requirements and achieve compliance.

IT support

Through FITI Connect service, our clients can access every test report from anywhere in the world simply by accessing our website. Test related statistical information is also available on the website.

Testing

The testing service of FITI dates back 50 years, allowing our customers to make sure that their products are in compliance with the regulatory requirements and their quality specifications. FITI, an accredited testing house, tests according to the test methods set by international and national standards such as International Organization for Standardization (ISO), European Standard (EN), American Association of Textile Chemists and Colorists (AATCC), American Society for Testing and Materials (ASTM), The US Consumer Product Safety Commission (CPSC), and Chinese national standards (GB) issued by the Standardization Administration of China (SAC).

FITI textile testing laboratory offers testing services on fibers, yarns, animal fibers, furs, fabrics, and garments.

- Performance Testing
- Functional Testing
- Hazardous Substances Testing
- Care Labeling
- Fiber Identification
- Flammability Testing
- Colorfastness
- Dimensional stability
- Physical Testing

Inspection

FITI, seasoned with almost half a century of expertise as well as highly skilled staff, helps improve your competitiveness in global market with a high quality of inspection service. With this inspection service, manufacturers can have a chance to review their product's quality objectively and correct any defects found out, contributing to making sure that their products would not cause any quality complaints. On the other hand, this service can be used effectively by retailers, who always want to ensure that the products they are going to put on the market don't have any defects particularly impairing saleability – wrong stitch, loosening threads, unbalance of collars, and so on. One of the merits FITI inspection has is to give solutions to any quality problems, rather than simply indicating the defects on the report.

- Pre-production inspection
- During production inspection
- Final random inspection

Auditing

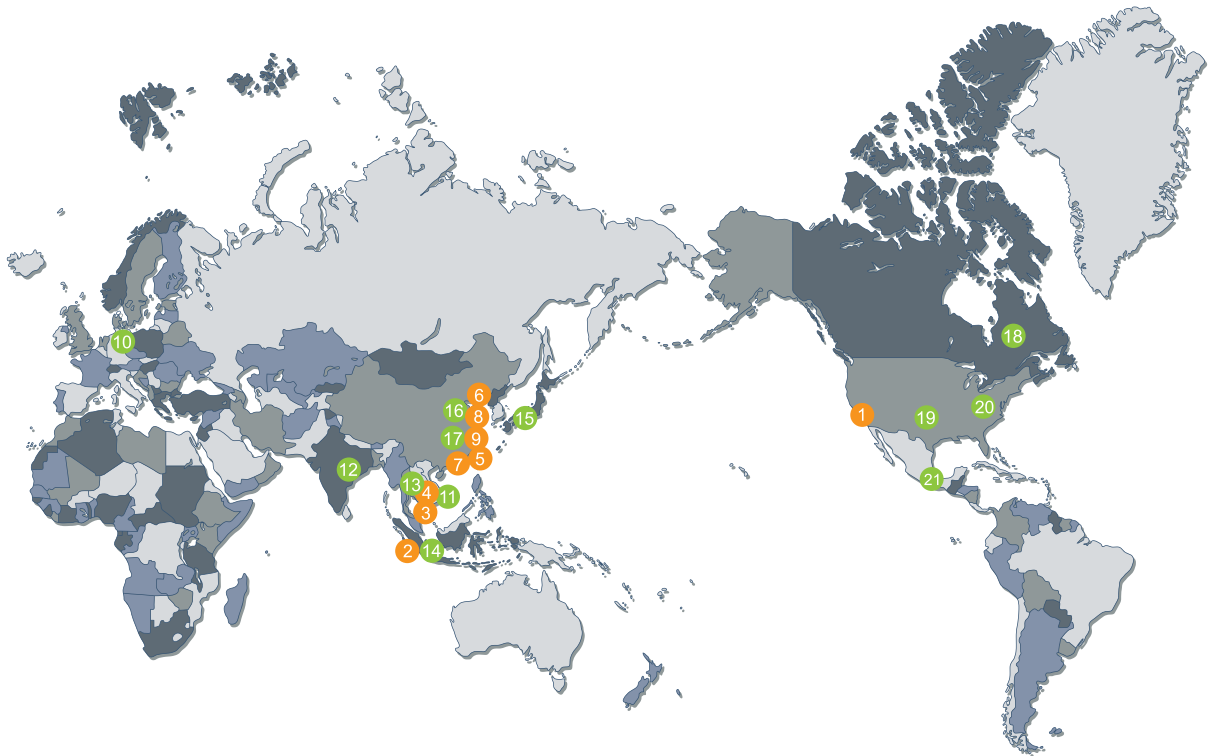

For your supply chain management and Quality assurance, we serve professional supply chain Audit and Assessment tools. More reliable process can make most reliable products. Our service scope is below :

- Factory product's safety and quality assessment.
- Factory Environmental assessment. (SAC – Higg Index)
- Factory Env – Monitoring services
- Process Transparency assessment tool

Apparel and Accessories Testing,
Inspection and Certification Services
for Global Brands
